## REPLACEMENT DIGITAL TEMPERATURE CONTROL

### How To Select a Furnace

Digital temperature controls fall into two basic types, process controllers and high limit controls (over temperature controls).

Process Controls handle the temperature and time requirements of the heat treat processes. These controls come in two types, non-programmable (single set point) and programmable.

Non-Programmable controls such as the model 935 are a single set point control, you simply input the desired temperature, along with a length of time to hold this
